

# **The Long Journey to Open Worlds**

Sten Huebler, Lead Designer - Crytek

# Structure

- ④ The initial level design concept and the changes
- ④ The visual approach
- ④ How we kept the overview of Sandbox levels
- ④ Level design iterations
- ④ How we reached the end of the tunnel

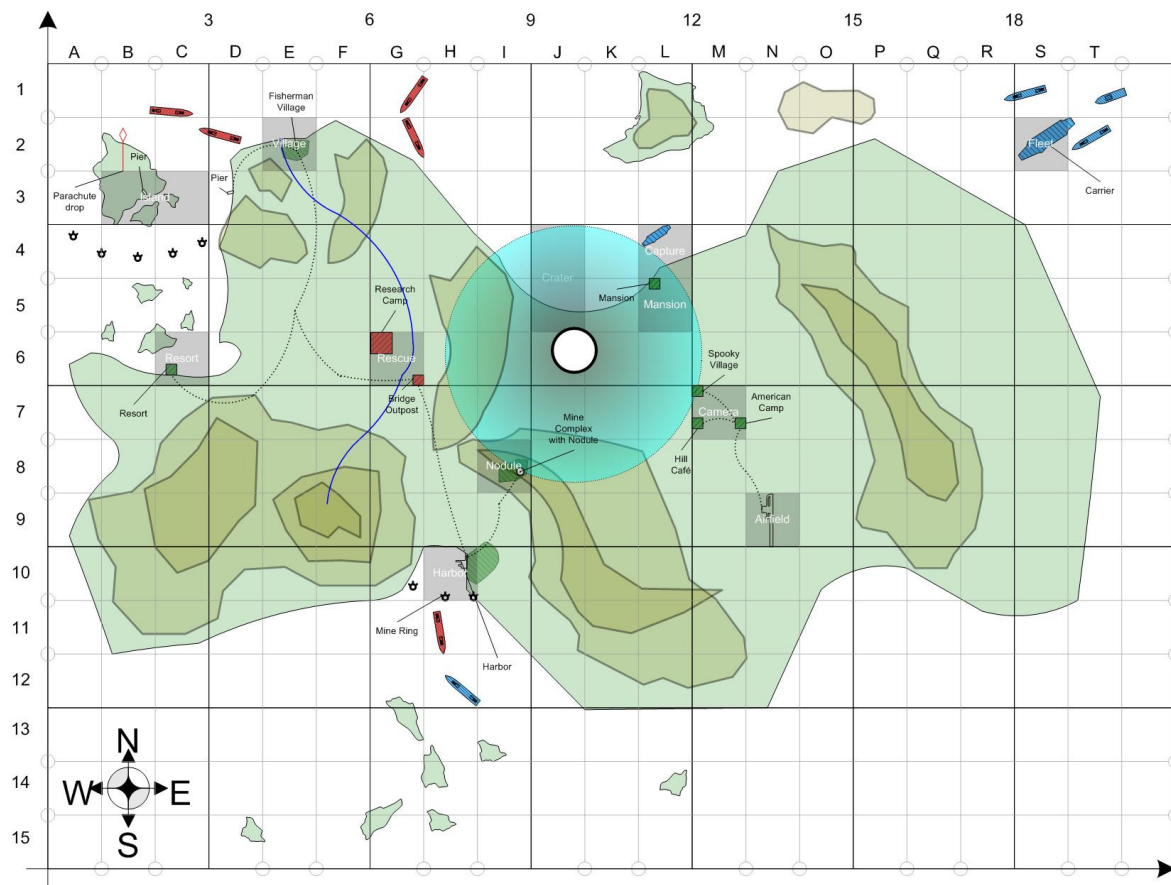

# The concept and its change

# One Island

- ③ One Sandbox Island
- ③ No level loads
- ③ Streaming sectors

# Three acts

## Act 1

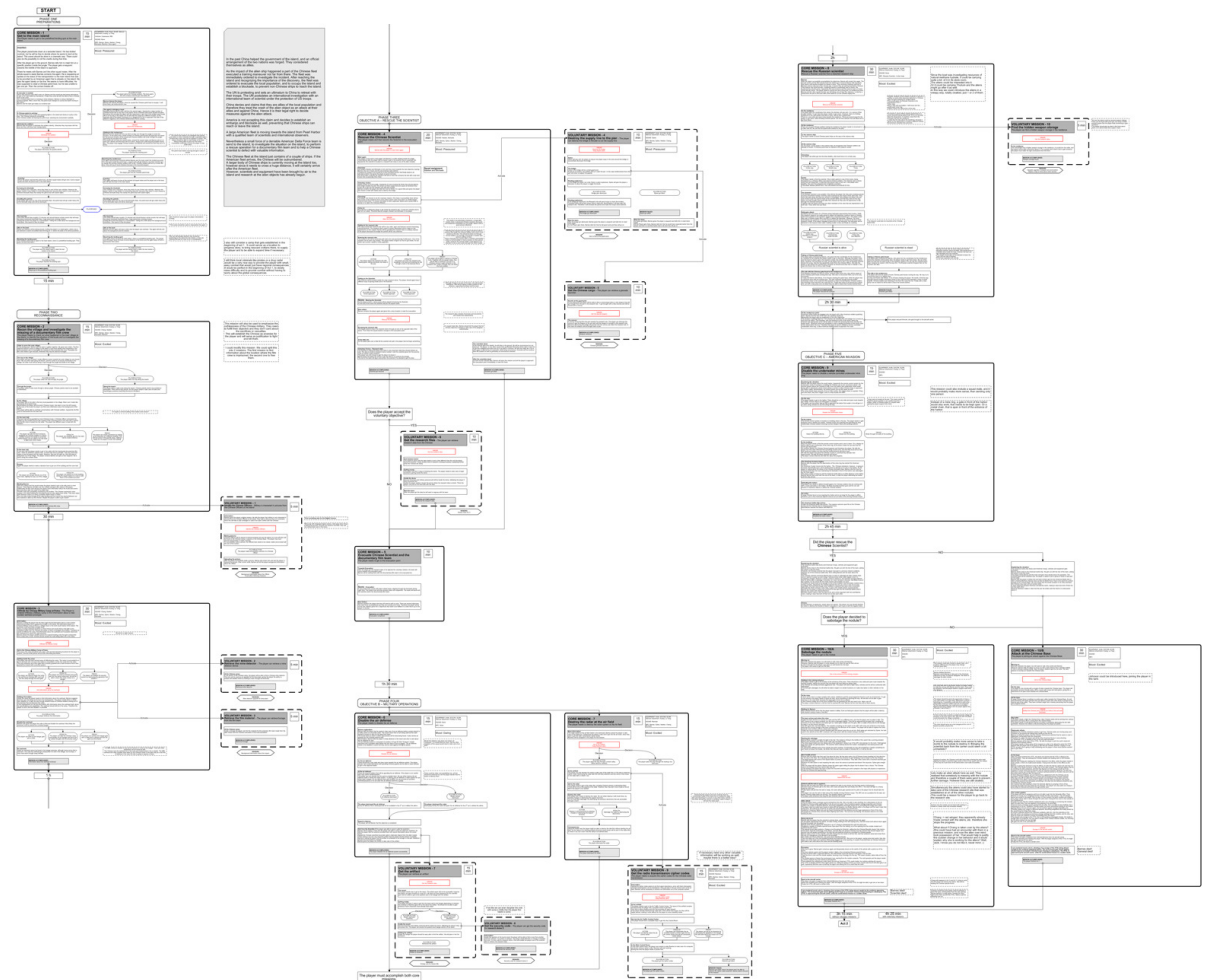

## Act 2

## Act 3

## ... and a branching story

- ⦿ Captain Laurence Barnes
- ⦿ Sgt. Michael Sykes
- ⦿ Martin Hawker
- ⦿ Elliot Johnson
- ⦿ Frank Ramirez
- ⦿ Joseph Beck
- ⦿ Ryan Miller
- ⦿ Dr. Charles Baxter
- ⦿ Dr. Albert Lesko
- ⦿ John "Shark" Harper
- ⦿ Samo Chia
- ⦿ Anna Kirovski
- ⦿ Jennifer Michaels
- ⦿ Lt. Caroline Chang
- ⦿ Admiral Richard Morrison
- ⦿ Commander Robert Powell
- ⦿ Dr. Chen Hau
- ⦿ General Kyong

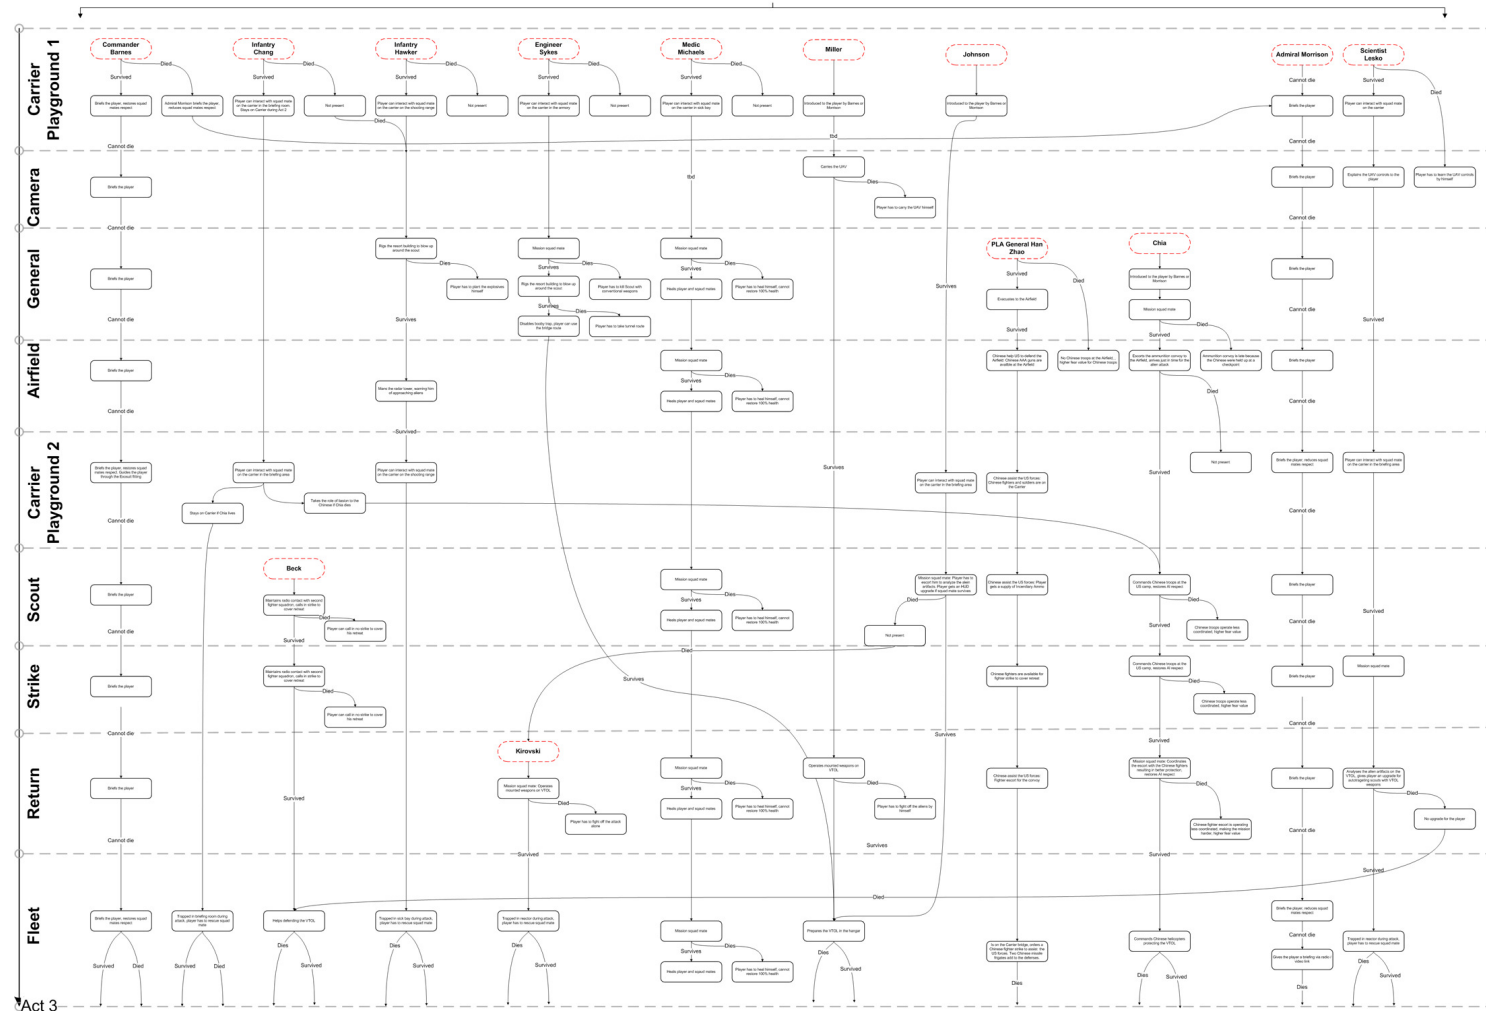

# Character timeline

## Character Tokens

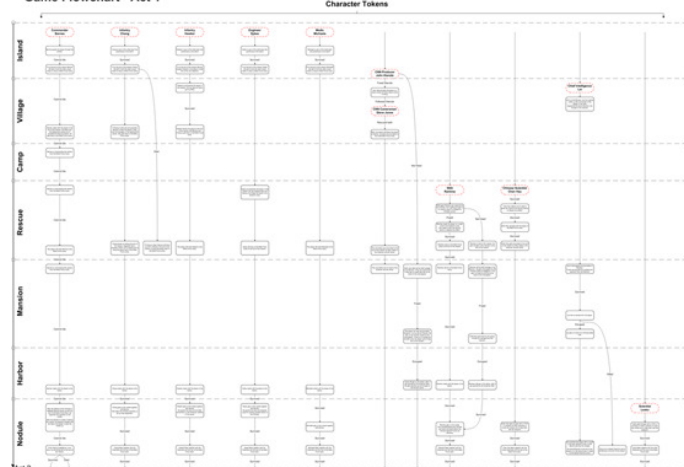

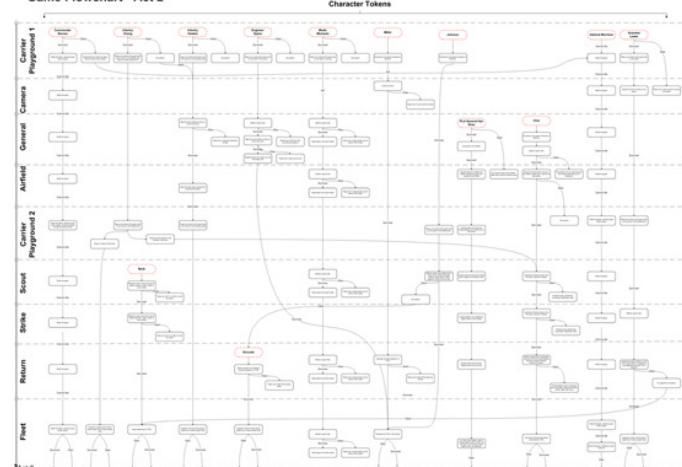

# The branching story Hydra

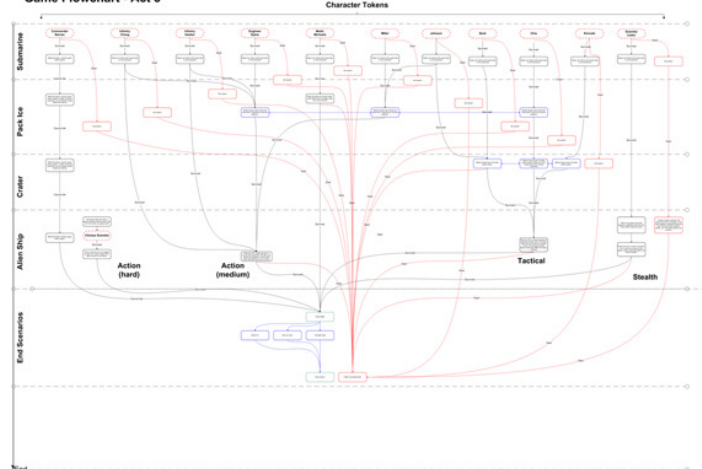

Game Flowchart - Act 1

Game Flowchart - Act 2

Game Flowchart - Act 3

## The problems

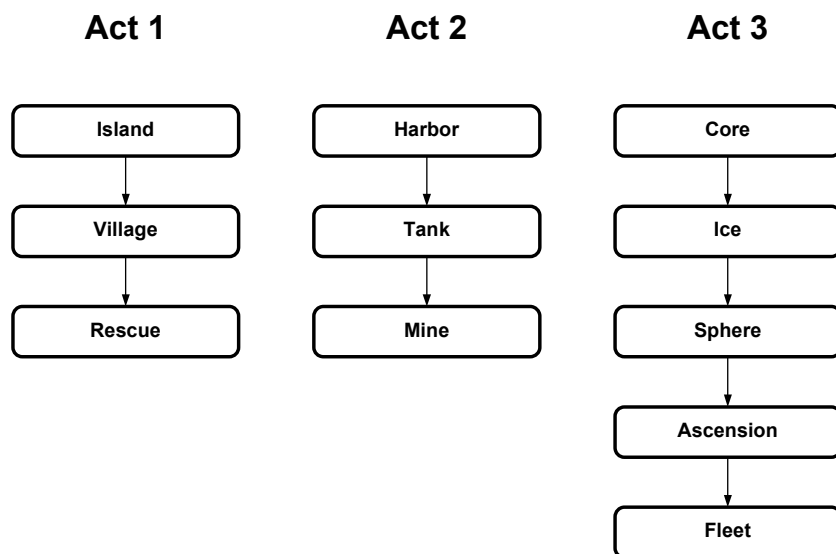

- ⌚ Too complex in its design
- ⌚ Too tedious to work out
- ⌚ Took focus away from working on actual content
- ⌚ Sounded good in theory, but was it fun in practice?

# The solution - reduce the complexity

- ⦿ Reduce amount of levels
- ⦿ No streaming Sandbox island
  - ⦿ ... but separate Sandbox levels

## The solution - reduce the complexity

- ⌚ Reducing the scope was necessary
  - ⌚ ... but caused story issues requiring a full rewrite
- ⌚ Separating the levels with no interaction between objectives
  - ⌚ ... made it unavoidable to rework most of the levels, since they were designed for one open island

## Reduced Complexity

- ④ Cut down and rework cast of characters from 18 to 10

- ④ ... allowed for more screen time and focus

- ④ No branching story

- ④ ... allowed us to develop the characters more deeply

# The visual approach

## Field Trip - Tahiti

Find out what it looks like!

## Field Trip - Tahiti

## Terrain and textures

# The problems of inventing the camera while shooting a movie

- ⊗ Instability and broken modules
  - ⊗ ... hindered progress on gameplay and AI development (Animation system)
- ⊗ Lack of reliable information about final engine capabilities meant
  - ⊗ ... difficulty defining the scope of the game
  - ⊗ ... few guidelines for level design in terms of engine performance and feature set

## The famous presentation about the terrain...

# Nature is not random!

## Analyze it and understand its rules

... to prevent accidents

# Art notes

# How to keep the overview?

## Abstract understanding

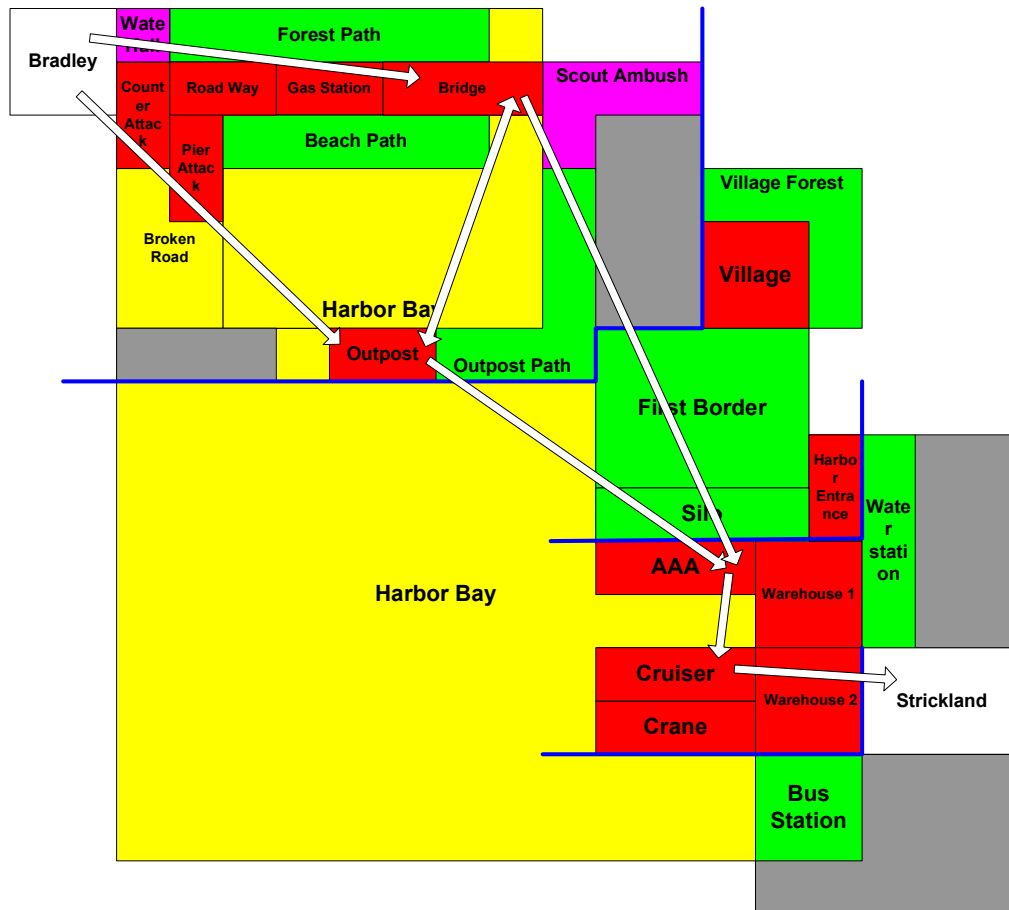

- ⊕ It's a game of freedom
  - ⊕ Players game vs. designers game
- ⊕ But how to prevent player to get lost?
  - ⊕ Objectives help the player find their way

# Abstract understanding

- ⦿ Gameplay obstacles for pacing, balance, entertainment and challenge
- ⦿ Prevent boredom
- ⦿ Gameplay focus
  - ⦿ Provide variety
  - ⦿ Stir up their play style once in a while

## Crysis - Overview

	1 Island	2 Village	3 Rescue	4 Harbor	5 Tank	6 Mine	7 Core	8 Ice	9 Sphere	10 Ascension	11 Fleet
Average estimated Playtime	30-45	30-45	30-45	30-45	30-45	30-45	30-45	30-45	30-45	15	30-45
Environment	Beach Jungle Jungle	Urban Jungle Jungle River		Beach Urban Jungle Plains Jungle Urban Quarry Mine			Alien ship Frozen jungle Frozen jungle Jungle		Jungle		Carrier
Weather	Sunny			Overcast		Cloudy - Clouds around alien ship	Alien	Clouds Snowy	Heavy rain Heavy winds	Heavy rain Heavy winds	Thunder storm
Time of day	Dawn 5 AM 10 AM Noon	Noon 10 AM 4 PM Dusk	Dusk 4 PM 9 PM Night	Night 5 AM 9 AM Dawn	Dawn 10 AM Noon 3 PM	Noon 3 PM Dusk 7 PM	Night	Dawn 11 AM Noon 3 PM	Noon 3 PM Dusk 7 PM	Dusk 7 PM 9 PM Night	Night 11 PM Dawn 5 AM
Main Experience	Infiltration			Assault			Retreat				Defend
Alien ship	Strange Mountain	Strange Mountain	Strange Mountain	Strange Mountain	Broken Mountain	Broken Mountain		Revealed Alien	Revealed Alien	Revealed Alien	Revealed Alien
Vehicles											

# Iterations

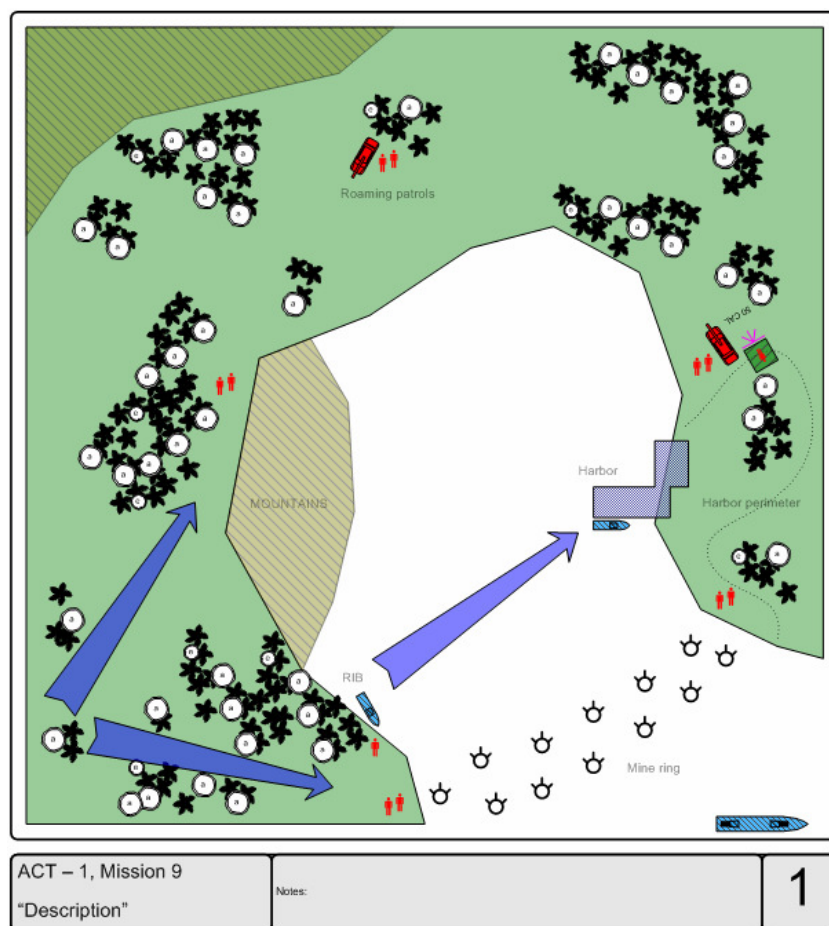

# Iterations

- ⌚ Idea/Concept
- ⌚ Layout
- ⌚ 1<sup>st</sup> pass
- ⌚ 2<sup>nd</sup> pass
- ⌚ Alpha
- ⌚ Final

# Idea/Concept

## Layout/1<sup>st</sup> pass

## 2<sup>nd</sup> pass/Alpha

# Final

# Crysis

- ④ Reaching the end of the tunnel

# Where is my department?

- ⌚ Reconstructed level design team
  - ⌚ Gameplay
  - ⌚ Art and performance
  - ⌚ Cinematics

## ⦿ Gameplay team

### ⦿ Mission design

⦿ Level flow, objectives, challenges

### ⦿ Minute to Minute gameplay

⦿ Nanosuit gameplay, AI passes, vehicle gameplay

### ⦿ Lead Level Designer

### ⦿ Level designers

### ⦿ Game designer

### ⦿ Technical designer

### ⦿ AI programmer

## Gameplay - The Nanosuit

- ⦿ Extra dimension of choices
- ⦿ Player-expressed hero
  - ⦿ Expressing Play style: Act, not react

➔ Feature IP

# Implement the tools to use a feature

- ⌚ Not in the original design, underestimated production impact
- ⌚ Levels have to be changed to prompt feature use
  - ⌚ Suit helpers

## Provoking feature use

- AI guidelines
- AI pass
- Vehicle pass

## Gameplay lessons

- ④ Prototype the core gameplay before starting the 1<sup>st</sup> pass on the levels
- ④ Prepare guidelines derived from the prototypes
- ④ Discover the specialists in the team and utilize them
- ④ Keep level designer ownership

# Visual fidelity vs. technical feasibility

## ⌚ Art and performance team

### ⌚ First iteration – polish and optimization

- ⌚ Art director
- ⌚ 2-4 Level Designers
- ⌚ Technical Designer
- ⌚ Special Effects Designer
- ⌚ Art support as needed

### ⌚ Second iteration – performance

- ⌚ Senior Level Designer
- ⌚ Level Designers
- ⌚ 4 Artists
- ⌚ 3 Programmers

## Visual fidelity

# Lighting and environment

## Structures and detail

## Terrain and decals

# Visual lessons

- ⌚ Do not start an art pass too early (preferable after 2<sup>nd</sup> pass)
  - ⌚ Gameplay first
  - ⌚ Structures first (1<sup>st</sup> pass)
  - ⌚ ... prevent resistance to change

## Visual lessons

- ⌚ Define lighting early (sun position) to fit to the direction the level is going to be played
- ⌚ Define matching colors at the beginning of the texturing pass
  - ⌚ ... otherwise complete terrain repainting might be necessary
  - ⌚ Due to engine limitation it was not possible to adjust afterwards
- ⌚ Use realistic reference

# Technical feasibility

- ⊗ Terrain optimization
- ⊗ Draw call limits
- ⊗ Physic/expensive objects
- ⊗ Flow-graph optimization
- ⊗ Missing or heavy LODs
- ⊗ Reducing diversity of specific objects
- ⊗ Checking/fixing/optimizing AI navigation

# Technical lessons

- ⦿ Setup limits and rules
- ⦿ Artist must follow those rules without exceptions
- ⦿ Design has to plan carefully
  - ⦿ Focus on important parts/objects
  - ⦿ Save memory/budget on unimportant stuff

# Cinematics

## Cinematic team

- ⦿ Lead animator
- ⦿ Cinematic designers
- ⦿ Storyboard artists
- ⦿ Writer

- ⦿ Motion Capture Studio
- ⦿ Internal animations and clean up
- ⦿ Voice recording
- ⦿ Sound remix

## The mystery boat

## Key lessons

- ③ Fail early and iterate faster
- ③ Understand your priorities
- ③ Challenge your favorite ideas
- ③ Derive guidelines from your prototypes
- ③ Use your team smartly
